VARIETIES

STUART—Large-sized nut, and safe variety to plant. It has made good over a wide territory.

SCHLEY—Good-sized, thinshelled nut. One of the best selling nuts, on account of its flavor and its characteristic of being well filled.

ALLEY—A close second to Schley in point of flavor. A prolific and early bearer.

FROTSCHER—Good-sized nut and considered a leader in one section by one of the most prominent growers.

DELMAS—Large nut, good seller and in high favor in some quarters.

CHOICE NUTS FOR SALE

To the Public

In presenting this price list of my pecan nursery stock I do so with the conviction that no one grows better trees and few grow as good; and further, that I dig them better than any nursery of which I have any knowledge. I specialize in pecans and my experience in planting my own orchards teaches me that while it is important to grow a good tree it is also equally important to dig and care for that tree in the best possible manner until it comes under the purchaser's control. I dig my trees just as if I intended to plant them—in fact I do plant many of them—and if the buyer will follow my directions his losses will be reduced to the minimum.

My varieties are true to name and I grow only those varieties that are endorsed by our National Pecan Growers Exchange. I solicit your patronage with the assurance that you will thereafter recommend my trees to your friends. I call your attention to the following letters from competent men who "know the last word" in the pecan industry:

What Our Customers Say--

Baconton, Ga., May 19, 1916.

Mr. Wm. P. Bullard, Albany, Ga.

Dear Sir: Have been thinking for some time that I would write you what I thought of the pecan trees that I planted last winter that came from your nursery. I must say the trees were the best I ever saw from any one's nursery, and I have been in the pecan business for eight (8) years. I understand that you are going to improve on your methods of digging trees—even better than you did last winter.

Yours truly,

R. C. MILTON.

Albany, Ga., May 5, 1915.

Mr. Wm. P. Bullard, Albany, Ga.

Dear Sir: I herewith hand you a letter from our Orchard Superintendent, Mr. Robert Brooks, regarding the pecan trees our company bought of you this last planting season.

When we were planting them Mr. Brooks said to me: "I never saw such fine roots on pecan trees. This from Mr. Brooks is a strong recommendation for your trees, for he has made a specialty of working and handling these trees for nine years, in both nurseries and orchards, and he has some very warm personal friends in the business.

Very truly yours,

E. KENNEDY.

Albany, Ga., May 5, 1915.

Mr. E. Kennedy,

Mgr. Cooleewahee Pecan Co., Albany, Ga.

Dear Sir: Replying to your inquiry as to my opinion of the pecan trees bought by this company, will say that those we bought this year from Wm. P. Bullard, of Albany, were the finest and best rooted 4 to 5-foot pecan trees that I ever saw.

ROBERT BROOKS.

Albany, Ga., May 22, 1916.

Mr. Wm. P. Bullard, Albany, Ga.

Dear Sir: Replying to your inquiry as to my opinion of your pecan nursery stock, will say that I have planted several thousands of them in different seasons and do not hesitate to say that they were the best pecan trees that I ever had experience with.

TR 26 1917
I have worked continuously in the pecan business for the past fifteen years in Georgia and Florida and for the past seven years have had charge of the field work of a 950-acre pecan orchard near Albany. I have planted pecan trees from most of the prominent nurseries grown in the states of Georgia, Florida, Mississippi, Louisiana, Texas and Alabama; in fact, during my pecan experience I have planted 50,000 to 60,000 of these trees and therefore think I am well qualified to express an opinion on the merits of a pecan tree,

For several years past I have been familiar with your methods of growing, digging and handling nursery stock and do not hesitate to state over my signature that I prefer your pecan trees over those of any I ever planted or ever saw planted.

Yours truly,

E. H. CHESTER.

Putney, Ga., July 12, 1916.

Mr. Wm. P. Bullard, Albany, Ga.

Dear Sir: Replying to your inquiry as to my opinion of your pecan nursery stock, will say that the trees have done fine, much better than I expected, owing to the long drouth this spring. I do not hesitate to say that they are the best trees I have ever planted. I have worked in the pecan business for the past 8 years in Georgia, and for the past four years have had charge of the field work of a 2,950-acre pecan grove at Putney, Ga. During my pecan experience I have planted over 80,000 trees, but consider your trees and methods of handling nursery stock superior to any other I have met with.

Yours very truly,

C. H. PUCKETT.

Albany, Ga., June 18, 1915.

Mr. Wm. P. Bullard, Albany, Ga.

Dear Sir: For some years past I have bought and planted some pecan trees each year. Last winter I bought some from your nursery and I most cheerfully here certify to the fact that they were the finest, best rooted and best dug pecan trees I ever planted. I had to redig all my holes (dug in my usual way) so as to take in the roots of your trees.

Yours truly,

WM. M. WILDER.

Mr. Wilder is a large stockholder and manager of the Albany Warehouse Company, one of Albany's most substantial business enterprises.

Mr. Milton learned the pecan orchard and nursery business under the instruction of one of the best known and most successful growers in the country. Mr. Milton began as an ordinary day laborer and now undertakes contracts in any section of the South for any kind of pecan nursery or orchard work.

Mr. Puckett, Mr. Chester and Mr. Brooks are the most capable and experienced pecan orchard superintendents in the United States.

Address all inquiries to

WM. P. BULLARD, ALBANY, GA.
